

LINKING COMMUNITY MONITORING WITH NATIONAL MRV AND REDD+ IN TANZANIA

Emmanuel Lyimo

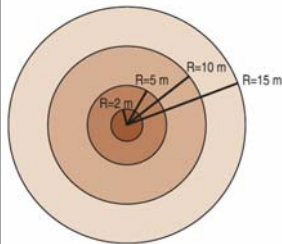

Workshop, Hotel Galeria Plaza, Mexico City; 12-14 September 2011

Capacity building to the community

- VNRC trained on carbon assessment methodologies based on NAFORMA approach of inventory.
- VNRC trained on PFRA
- Use of equipment such as Compass, GPS, Diameter tape, Hypsometer, etc

Method of data collection

- Radius: 15 m
Trees: DBH \geq 20 cm
- Radius: 10 m
Trees: DBH \geq 10 cm
- Radius: 5 m
Trees: DBH \geq 5 cm
- Radius: 2 m
Trees: DBH \geq 1 cm

PARAMETERS ASSESSED

Plot data

- DBH
- Position (UTM coordinates)
- Photo
- Land use
- Vegetation
- Ownership
- Human impact
- Canopy coverage
- NWFP
- Soil
- Regeneration
- Stumps
- Dead wood

Assessment of forest condition

- Disturbances
- Live timber and poles tree
- Invasive alien species
- High conservation values

Thanks for Listening
