

EXPERIENCES IN COMMUNITY MONITORING CARBON STORAGE

Elsa Esquivel Bazán

MRV EXPERIENCES IN COMMUNITIES OF CHIAPAS

MARQUES DE COMILLAS

- Fire management and Scolcl to program
- Community forestry brigades (permanent local information of sites)
- Community planning
- Work tools (GPS, simple formats)

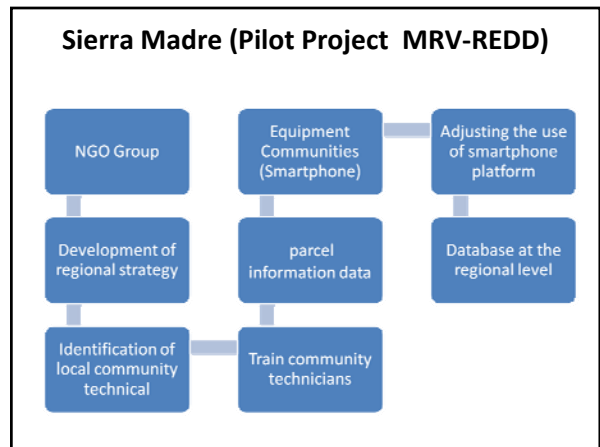

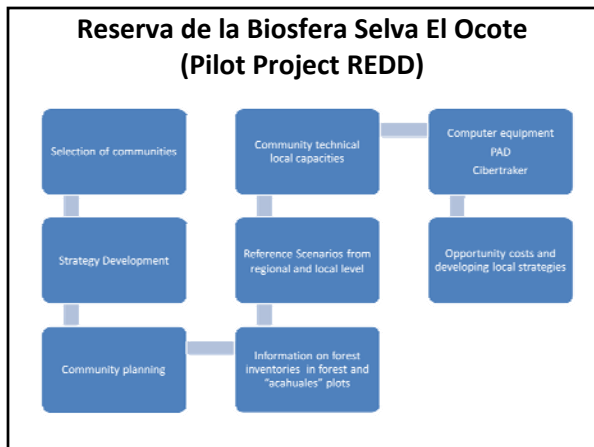

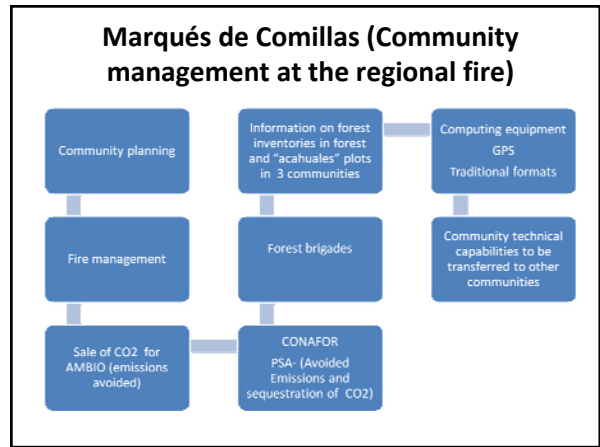

RESERVA DE LA BIOSFERA SELVA EL OCOTE

- REDD scheme Project
- Technical, trained community members (Some experience in survey data C)
- Equipment PAD, SIG

SIERRA MADRE DE CHIAPAS

- Participation of different institutions (PMC, Pronatura, CONANP)
- MRV-REDD Experience Development (Interinstitucional)
- Community technical experience in data collection
- Equipment Smartphone (android)

General considerations

- Identification of local capacities
- Build local capacity and incorporate local knowledge
- Training costs
- Constant support
- Caring for the expectations of the sale of carbon
- It is important to preserve locally created capacity
- Develop appreciation and respect for local conditions (safeguards)

- You need to think beyond the competencies of local makers of data, it is important to consider them as decision-decisions in the use of their resources
